Water Treatment plant

High-efficiency water treatment plant. ozonization process & chemical handling equipment

Environmental installation

Aerating system, Ozone generator, Support Agitator & Complex system

Reduction of odor equipment

Scrubber System for Adsorption treatment of odor & Equipment

Thermal spray coating

Waterproof , Acid resistant , Strong durability Nontoxic eco-friendly coating technology

garam environmental technology

Factory

#13 Bongsu-daero 1825beon-gil, Yangchon-eup, Gimpo-si, Gyeonggi-do, Korea

HEAD OFFICE / R&D Center

#1108 Newcastle, 429-1, Gasandigital 2-ro, Geumcheon-gu, Seoul, Korea

Our company,

specializes in environmental pollution prevention facilities.

Research and manufacturing of the products is carried out directly by our company.

And these products are sold all over the country.

Head office & R&D Center located in the Digital Industry Complex in Seoul and regional offices in Daejeon and Busan.

The major business areas of our company are designing and constructing water treatment facilities, sewage odor reduction facilities, water-bloom elimination facilities, thermal spray coating, etc.
